

# Masks

By benny

Masks are annoying but very important.

Masks are uncomfortable and even fog up my glasses. As you know i just got glasses, and masks always fog up my glasses. It's so annoying. Anyways, masks are also very useful for the fact that they slow the spread of covid. Although they can be itchy and very uncomfortable, it's the only way to protect us from covid. They let us do things normal, like go to the store, go to school and some places all you have to do is wear it in the entrance. For example, when I go to hockey. We don't have to wear a mask on the ice. We only have to wear it is at the entrance of the arena. I know, you guys are probably saying but benny

how do we

Breathe in those masks. But all i have to say is deal with it. In conclusion, masks are very useful.
